COMPANY PORTFOLIO

Secure infrastructure. Practical engineering. Reliable support.

Sukkur, Sindh, Pakistan • Serving projects across Pakistan

www.mbhtechnologyskr.com

Technology that works beyond the proposal stage.

MBH Technology is a field-led IT, telecom and security solutions company based in Sukkur, Sindh.

We design, supply, install, test and support dependable technology infrastructure for businesses, institutions and project sites. Our work combines practical site experience with modern engineering, clear documentation and accountable after-sales support.

15+	24/7	PK
YEARS EXPERIENCE	TECHNICAL SUPPORT	PROJECT COORDINATION

How we create value

Single-point accountability Survey, design, supply, installation, testing and support under one coordinated delivery path.	Practical system design Solutions planned around site conditions, operational needs, safety, scalability and budget.
Transparent quotations Relevant products, separate installation and testing charges, and clear technical scope.	Support after handover Commissioning records, troubleshooting, preventive support and maintenance options.

Founder & technical leadership

Rameez Raja Memon — Founder and IT & Telecom Engineer. MBH Technology is built around hands-on implementation experience in networking, wireless, surveillance, telephony and site infrastructure.

One engineering partner. Multiple technology domains.

Data Center Solutions Racks, servers, storage, power protection, structured infrastructure and dependable site integration.	Core Networking LAN/WAN, routing, switching, fibre, enterprise Wi-Fi, VLAN planning and secure connectivity.
CCTV & Security IP/HD surveillance, recording, remote monitoring, access control and security system integration.	Wireless P2P Links Point-to-point and point-to-multipoint connectivity for campuses, remote sites and inter-building links.
IP Telephony & PABX Panasonic PABX, VoIP, SIP endpoints, extension plans and inter-building communications.	Fire Alarm Systems Detection and alarm infrastructure, cabling, device installation, testing and commissioning support.
Electrical & UPS UPS, power protection, technology-room electrical works, testing and preventive maintenance.	IT Equipment Supply Computers, printers, networking hardware, deployment support and project-based procurement.

Designed for performance, security and growth.

MBH Technology plans connectivity as an operational system—not simply a collection of devices. The design process considers coverage, throughput, resilience, segmentation, future capacity and maintainability.

Core capabilities

- Enterprise LAN/WAN design, routing, switching and VLAN architecture
- Structured copper and fibre cabling with rack dressing and labelling
- Enterprise Wi-Fi, outdoor wireless, P2P and PtMP radio links
- Remote-site connectivity and VSAT integration support
- Fluke testing, fibre OTDR certification and commissioning documentation
- Cisco, MikroTik and Ubiquiti-focused solution planning without implying manufacturer partnership

Delivery path

Every network proposal is matched to the required user count, application load, security requirements, distance, civil constraints and support model.

Protection, visibility and control—engineered together.

Video Surveillance Camera placement, coverage planning, IP/HD cameras, NVR/XVR systems, storage sizing and remote access.	Access Control Biometric attendance, controlled entry, user enrolment and reporting workflows.
Fire Detection Addressable/conventional system scope, detector and sounder placement, cabling and testing.	Power Continuity UPS sizing, backup power, protection and site-readiness checks for critical devices.

System assurance

- Pre-installation scope validation
- Installation against approved design/BOQ
- Labelling and configuration records
- Testing, commissioning and handover
- Corrective and preventive support options

Solutions may use established brands such as Dahua, Hikvision, ZKTeco, Grandstream, Panasonic, HP, Dell, Cisco, MikroTik and Ubiquiti according to project requirements and availability. Brand mention indicates product experience, not an authorized partnership unless separately documented.

Verified engagement highlights.

Status is stated clearly so proposals are not presented as completed installations.

ENGAGEMENT	SCOPE	STATUS
Civil Hospital Shikarpur – Trauma Center	Infrastructure coordination and execution support covering telecom/PBX, cabling, CCTV, fire-alarm-related works and associated materials/services.	Execution support / project coordination
DHQ Shikarpur – BOQ-aligned systems	Telecom/PBX, CAT5e/CAT6A cabling, CCTV scope including 4MP IP cameras, fire alarm, conduits, Fluke testing and OTDR certification.	BOQ / technical scope
Sukkur Municipal Corporation – Public Wi-Fi	Concept for managed public Wi-Fi coverage with a limited pilot approach, network controls and performance evaluation.	Proposed 30-day pilot
Education – Smart attendance	Biometric attendance and parent SMS workflow concept for schools, with reporting and administrative control.	Solution proposal / development

Detailed client references, BOQs and completion evidence can be shared where available and permitted. Confidential customer information is not included in this public portfolio.

MBH Service Desk

A connected workflow for customers, administrators and approved field installers.

Customer portal Submit service requests, request quotations and track the progress of jobs online.	Operations dashboard Secure staff view for triage, search, status control, installer approval and request coordination.
Installer workflow Approved installers can receive category-relevant opportunities and accept jobs subject to MBH approval.	Product quotation engine Relevant products, sales prices and separate installation/testing charges can be added to quotations.

Current platform access

Customer Service Desk: <https://mbhtechnologyskr.com/app/>

Installer Portal: <https://mbhtechnologyskr.com/app/installer/>

Online Quotation: <https://mbhtechnologyskr.com/app/quotation/>

The platform is designed to support category-based service routing, installer approvals, customer communication and structured quotation workflows as capabilities are progressively activated.

Built for organisations that need reliable field execution.

Government Public facilities, offices and infrastructure projects.	Healthcare Hospitals, clinics and critical operational environments.
Education Schools, campuses, labs and administration systems.	Banking & Enterprise Secure connectivity, surveillance and support requirements.
Oil, Gas & Remote Sites Long-distance connectivity, power resilience and remote communications.	Retail & Hospitality Multi-site networks, CCTV, Wi-Fi and business systems.

Engagement model

- Requirement discussion and site survey
- Technical design, BOQ and commercial proposal
- Procurement and delivery planning
- Installation, configuration and quality checks
- Testing, commissioning and client handover
- Support, maintenance and improvement planning

Plan your next site, network or security project with MBH Technology.

Share your requirement, location and preferred timeline. We will help define the right technical scope and prepare a clear quotation.
